

CV — Asbjørn Rørvik (tailored for GeoWeb frontend assignment)

Senior frontend/fullstack developer — Stavanger, Norway hei@asbjornrorvik.dev · www.asbjornrorvik.dev · linkedin.com/in/asbjornrorvik Org.nr 820 252 632 · +47 47 65 86 51

Profile

8+ years of production experience delivering complete digital products — frontend, backend, CI/CD and operations. Sole builder and operator of Supportify (React/Next.js/TypeScript SaaS, 100+ paying Shopify stores). Background from cross-functional scrum teams delivering business-critical applications for Equinor, Kolumbus, Altibox and Easee. Fluent English, remote-proven, comfortable owning delivery end-to-end.

Core competencies (mapped to the GeoWeb requirements)

Area	Tools and technologies
Frontend web	React, Next.js, TypeScript, HTML, CSS3
Mobile	React Native (Equinor, NLR KSL app via Netpower), Flutter (Kolumbus, Altibox)
State & UI libraries	State management across React/React Native production apps; working familiarity with Redux and Material UI
Geospatial UI	OpenLayers in production (Kolumbus real-time transit map, Flagchase course maps)
Testing	Jest in production pipelines; working knowledge of Cypress and Storybook; CI-enforced gates
Build & tooling	Webpack, NPM, monorepo tooling (NX: familiar, not yet in production)
Backend & APIs	Go, .NET/C#, Node.js/TypeScript, REST, GraphQL
DevOps	Docker, GitHub Actions, GitLab CI, Azure; App Store/Play releases
Security & compliance	PCI DSS environment (EaseePay), offshore security regimes (Equinor), GDPR-conscious design
AI/LLM	LLM integrations, AI-driven development workflow (Dr. Dropin, Supportify)

Experience

Period	Role	Organisation / clients
2026 (Jul–Sep)	Sole developer — full product, idea → production in 2 months, AI-driven	Dr. Dropin (healthcare; confidential, via Folq)
2025 –	CTO / co-founder	Supportify (own venture)
2024 –	Developer (external)	Netpower Software AS — Kolumbus, NLR, Aero Norway
2021 – 2024	Consultant	Bouvet ASA — Equinor, Altibox, Easee
2020 – 2021	Developer	WOIT AS
2018 – 2020	Developer	Norsahel · Needle AS

Selected deliveries

- **Supportify (2025–):** AI customer-support platform for Shopify. Unified inbox (chat, e-mail, Instagram, Messenger); AI agent resolves up to 85 % of inquiries automatically. 100+ paying stores. Built and operated alone.
- **Kolumbus real-time travel app (2024–2025, team):** 142,000+ monthly active users; route planning, real-time vehicle map, contextual notifications, pay-as-you-go payment. Nordic Public Transport Design Award 2025.
- **Equinor Notifications & Workorders (2023, team):** two business-critical offshore apps in React Native + TypeScript, delivered under strict security and release regimes.
- **Altibox Home (2023–2024, team):** smart-home app for hundreds of thousands of customers, built from scratch in a cross-functional scrum team.
- **EaseePay (2021–2022, team):** payment module for EV charging, PCI DSS-compliant Adyen integration.
- **Open source / own products:** ShapeltUp (CAD scripting for VS Code, TypeScript/Three.js), Flagchase (OpenLayers course maps, NFC checkpoints), Dropby (event-based social network).

Education

B.Sc. Automation and Electronics Design — University of Stavanger, 2013–2016.

Languages

Norwegian (native), English (fluent — working language in several engagements).
